## SMALL FORM FACTOR OPTICAL TRANSCEIVER WITH EXTENDED TRANSMISSION RANGE

## **Cross-Reference to Related Applications**

No. 10/629,253, filed July 28, 2003, entitled "Small Form Factor Transceiver with Externally Modulated Laser", which is a continuation-in-part of U.S. Patent Application Serial No. 10/625,022, filed July 23, 2003, entitled "Multi-Layer Ceramic Feedthrough Structure in a Transmitter Optical Subassembly", which claims the benefit of U.S. Provisional Patent Application Serial No. 60/477,868, filed June 12, 2003 and is also a mow u.s. Patent No. 6,703,561 continuation-in-part of Application No. 10/231,395, filed August 29, 2002, which is a continuation-in-part of Application No. 10/077,067, filed February 14, 2002, now U.S. Patent No. 6,586,678, entitled "Ceramic Header Assembly." The foregoing patent applications and patents are incorporated herein by reference.

## BACKGROUND OF THE INVENTION

## Technological Field

[0002] This invention is generally concerned with the field of opto-electronic systems and devices. More specifically, embodiments of the present invention relate to a transistor header that includes various features directed to the enhancement of the reliability and performance of various electronic devices, such as lasers, included in the transistor header.
